

# EMERGENCY CARTS

- LIGHTWEIGHT ALUMINUM CONSTRUCTION
- PROOF-OF-ENTRY SEAL
- INTERNALLY MOUNTED DEFIBRILLATOR SWING-ARM AND I.V. POLE
- CARDIAC BOARD AND BRACKET

The **EMC1** Emergency Cart has been designed for quick and easy maneuverability, from its lightweight aluminum frame to the casters that roll comfortably over carpeted as well as non-carpeted floors. Perimeter bumpers protect the cart from damage. The molded ABS plastic top ensures long-lasting wear and is easy to clean, while the raised lip and sides contain spills and serve as cart handles. The EMC1 provides maximum storage capacity via two 3-inch drawers, one 6-inch drawer and two 9-inch drawers. Full-extension drawer slides ensure that all the contents of each drawer are visible and accessible. Drawer contents can be organized to fit your needs with aluminum and plastic dividers. Dividers for 6" or 9" drawers can be arranged to create up to nine compartments per drawer.

#### EMERGENCY FEATURES:

Standard *defibrillator swing -arm* can be rotated a full 360° to expose the Emergency Cart's work surface for other instruments. Because the arm is internally mounted, cart stability is maintained even when a defibrillator is in use.

The *I.V. pole* is secured internally for strength and stability. The pole's height is adjustable for maximum flexibility.

The *oxygen tank bracket* is mounted within the recessed side to eliminate interference with connections and to protect the tank from damage as the cart is moved about.

*Cardiac board* slides easily out of brackets on the back of the cart for fast removal.

The *proof-of-entry flap* accommodates a variety of breakaway security seals, thus allowing quick access to cart contents.

A braking caster ensures that the Emergency Cart won't shift during procedures.

**EMC1**- I.V. Pole, Oxygen tank bracket, Defibrillator swing arm, Four 5" Casters (one with brake and one with locking swivel).

#### Drawers:

2 - 3" deep with one divider set,  
1 - 6" and 2 - 9" deep with 1 set of dividers.

Overall cart size: 27 1/2"W.x22"D.x42 1/2"H.

Approx. shipping wt. 210 lbs.

**Finish:** Agean Blue

3" deep drawer accepts standard exchange trays.

#### SMALL FOOTPRINT WITH MAXIMUM STORAGE CAPACITY

#### SERVES MULTIPLE USES

#### FULL-ACCESS DRAWERS

#### DURABLE STEEL BODY

The **UC1** is a *versatile Utility Cart* that can serve in several capacities, such as supplies cabinet, treatment cart, bedside cart, or procedures support. The cart's compact design allows it to be placed in tight spots, yet its large drawers provide ample storage capacity. Cart contents are secured with a barrel lock.

The **UC1** provides maximum storage capacity via one 3-inch drawer, two 6-inch drawers and one 9-inch drawer. Full-extension drawer slides ensure that all the contents of each drawer are visible and accessible. Drawer contents can be organized to fit your needs with plastic divider sets.

A protective bumper around the base ensures the UC1 won't damage other equipment, while its steel frame promises years of durable use. The molded ABS plastic top provides long lasting wear. A raised lip ensures that spills are contained on the top for quick clean up. The 4" casters include two directional locks for enhanced maneuverability.
