

QUICKDRY - FILM DRYERS

- 12 FILM CAPACITY
- THERMOSTATICALLY CONTROLLED
- STAINLESS STEEL or BAKED ENAMEL
- AVAILABLE WITH AUTOMATIC TIMER
- CHOICE OF LEFT HAND DOOR or RIGHT HAND DOOR
or SPLIT DOUBLE DOORS

The QUICKDRY Dryer can be placed on the floor or on a table. It will economically deliver clean, warm air for fast drying and is thermostatically controlled to prevent dangerous overheating. The air recirculating system keeps heat inside the dryer and speeds drying in any weather. A heavy duty timer (120T) is also available.

The cabinet is cold rolled steel with a baked enamel finish or polished Stainless Steel. The hanger rack is constructed of heavy Stainless Steel and will hold twelve 14"x17" hangers. The bottom is covered by a removable Drip Tray. Doors are reinforced and available in your choice of right hand opening, left hand opening, or split double doors. Right hand units have hinges located on the right side of the door and the door opens from left to right. Left hand units have hinges on the left side of the door and open from right to left.

ALL DRYERS OPERATE ON 118volts 60HZ-AC 6 AMPS. Other voltages available on special order.

Finish: Stainless Steel units are polished to a satin finish. Baked Enamel units: light gray .

*** Optional Items:** 120T: Built in Heavy Duty Timer

FILM DRYING RACKS

FOLDING DRYING RACK

- 12 HANGER CAPACITY
- FOLD AWAY TRAY
- EASY WALL MOUNTING

The Folding Drying Rack, constructed entirely of polished Stainless Steel, holds twelve 14"x17" hangers. A solid Stainless Steel back protects the wall at all times and the 20" x 17" tray can be folded up against the back for extra convenience when not in use. It can be mounted quickly and easily in any location. The rack is 23" high, 20" wide and 17" deep with the tray in the open position.

FILM DRYERS

THERMOSTATICALLY CONTROLLED
12 or 15 FILM CAPACITY
STAINLESS STEEL or BAKED ENAMEL
AVAILABLE WITH FORMICA TOPS
AVAILABLE WITH AUTOMATIC TIMER
HIGH EFFICIENCY

This is the small dryer with large dryer features. Scientific air circulation design creates fast drying at high efficiency. Cabinets of polished Stainless Steel or cold rolled steel are available both in twelve and fifteen film capacities.

Film hangers fit into specially slotted holders that keep them separated and vertical at all times. All interior parts are made of Stainless Steel. The drawer opens its full width on ball bearing extension slides. The Stainless Steel drip pan moves with the drawer and is always under the wet film.

The drying system includes a heavy duty motor and fan plus a thermostatically controlled 750 watt sealed heating unit separately controlled but interlocked so that the heater will not function without the fan. A heavy duty timer (**120T**) is also available. The air system recirculates the same heated air many times, thereby obtaining additional drying without additional heat and reducing the heat exhausted into the darkroom, so that normal ventilation is usually sufficient without additional ducts. A pre-set thermostat prevents overheating.

Cabinets are constructed of heavy gauge material welded together for strength.

ALL DRYERS OPERATE ON 118 volts 60HZ AC 6 AMPS. Other voltages available on special order.

With or without optional base these dryers can be matched with other 15" cabinets (see page G-9).

Finish: Stainless Steel units are polished to a satin finish. Baked Enamel units: Standard finish - light gray baked enamel. Optional Formica Tops are white.

*** Optional Items:**

Base: Designed to raise the dryer 3.5" to provide toe kick space and match 15" Darkroom Cabinets with bases.

Top: Formica Dryer Tops are .75" thick and provide a non-marring work surface.

120T: Built in Heavy Duty Timer
